INTRODUCTION

The Aegean Conference on Electrical Machines and Power Electronics (ACEMP) was first organized in 1992 by the Middle East Technical University and Istanbul Technical University. The motivation at the time was to take advantage of the bridging position of Turkey between the Western and Eastern Europe and the new countries emerging to the east of Turkey, and to provide scientists a medium where they can meet and exchange ideas. Since then ACEMP became well established in the past 18 years and served its purpose.

Organizing committees of OPTIM and ACEMP conferences, have had discussions after the OPTIM'14 conference in May in Romania and have decided to make a serious effort to organize these conferences jointly in the future, thus increasing the quality, participation, international recognition and reputation of both conferences. On this occasion Electromotion is also joining this effort.

The first joint event is now taking place with the acronym “ACEMP-OPTIM-Electromotion” in Side, between 2-4 September 2015. Thank you very much for participating in this meeting.

Once again in the true tradition of ACEMP and OPTIM the conference has a set of invited papers, covering topics of much interest to the electrical machines and power electronics community. These papers are presented by worldwide known experts from Europe and United States. We thank them for participating in this meeting.

Furthermore, the conference is technically co-sponsored by IEEE-IAS, IEEE-IES IEEE-PELS and IEEE-PES. Thanks go to IEEE for supporting this meeting and to our friends who worked hard to make this possible.

I would like to acknowledge also the effort of the referees who generously devoted their time and reviewed about 200 papers we received.

Wish you all a memorable meeting.

Prof. Dr. H. Bülent Ertan
